SUMMARY

SDE-2 Frontend Engineer with 4+ years building **enterprise analytics platforms** used by **1,000+ users across the US & EU**. Specialised in React, TypeScript, and Node.js with a track record of cutting load times by **25%**, reducing deployment cycles from **2 weeks to 4 days**, and leading post-merger platform consolidation for **5,000+ client accounts**. Currently at GfK-NIQ, seeking a senior frontend or full-stack role at a product-led company.

EDUCATION

MASTER'S OF COMPUTER APPLICATION

Vellore Institute Of Technology

CGPA: 9.25

2020-22

BACHELOR'S OF COMPUTER APPLICATION

IMED, Bharati Vidyapeeth, Pune

CGPA: 8.85

2017-20

EXPERIENCE

GfK – An NIQ Company | Software Engineer / SDE-2

Pune

June 2024 - Present

- Partnered with Sales & Product teams in Agile/Scrum to streamline onboarding and drive upsell strategies, increasing revenue by **15%**.
- Delivered features and performance improvements for GfK's analytics platform, reducing load times by **25%** for **1,000+** users.
- Led post-merger integration with NIQ, consolidating **5,000+** client accounts into a unified platform.
- Implemented secure authentication using **Auth0 & Node.js**, ensuring **GDPR/SOC2** compliance and reducing login issues by **30%**.
- Optimized CI/CD (GitLab, Docker), reducing deployment cycles from **2 weeks to 4 days**.
- Collaborated with global teams to enhance frontend architecture and maintain consistent UI/UX.
- Tech Stack: **ReactJS, Redux, Node.js, TypeScript, JavaScript, Google Cloud Platform, MYSQL, HTMX, Jest, Docker, GitLab CI/CD, SonarQube, GitHub Co-Pilot, Helm charts, Server-Side Rendering**

NielsenIQ (NIQ) | Software Development Engineer (SDE-1 / SDE-2)

Pune

July 2022 – June 2024

- Designed and developed core modules of NielsenIQ's analytics platform, enabling dataset creation for **200+** enterprise clients across US & EU.
- Led frontend migration from Material-UI to an in-house library, improving consistency and reducing costs by **20%**.
- Led the Admin Configuration App (pay-as-you-use model), creating dynamic access control and improving data accuracy for **1,500+** users.
- Increased unit test coverage from **40% to 90%** using Jasmine/Karma and SonarQube.
- Tech Stack: **Angular, TypeScript, JavaScript, Microsoft Azure, HTML5, CSS3, AG-Grid, Jasmine/Karma, SonarQube, JIRA, Confluence, Jenkins**.

Gemini Solutions | Technical Trainee (Frontend Developer)

Gurugram

Sept 2021 – June 2022

- Delivered the frontend for a financial advisory platform serving **1,200+ paid users**, achieving **80% WCAG 2.1 accessibility compliance** – enabling the product to meet enterprise client requirements and expand to regulated markets.
- Built an Employee Recognition System for **800+ users** using Angular and TypeScript, driving a **20% increase in engagement** and improving Lighthouse performance scores from **60 to 80** through lazy loading and bundle optimisation.
- Engineered a library of reusable UI components with Angular, Bootstrap, and TypeScript, **cutting per-feature development time** and ensuring consistent UX across 3+ product workflows.
- Tech Stack: Angular, TypeScript, JavaScript(ES6), HTML5, CSS3, Material-UI, AWS, JIRA, Git, Webpack.

SKILLS

- Languages: JavaScript (ES6+), TypeScript
- Frontend: React, Redux, Angular, HTMX, HTML5, CSS3, Tailwind CSS, Material-UI, Bootstrap, AG-Grid, Server-Side Rendering
- Backend: Node.js, REST APIs, Auth0
- Databases: MySQL, MongoDB, PostgreSQL
- Testing: Jest, Jasmine, Karma, SonarQube
- Cloud & DevOps: Google Cloud Platform, AWS, Docker, Helm Charts, Jenkins, GitLab-GitHub CI/CD
- Tools & Practices: JIRA, Confluence, Git, Webpack, GitHub Copilot, Claude, Agile/Scrum, GDPR/SOC2 Compliance, WCAG Accessibility

PROJECTS

MovieBox AI-based movie recommendation system

- Developed a movie recommendation using **ReactJS, JSX**, and **JavaScript**. Designed with **Tailwind CSS**, tested with **Jest**, and version-controlled on **GitHub**. Deployed on **Netlify** to showcase end-to-end development skills.
- Used **Gemini-AI** for movie recommendation, and **TMDB API** for movie data.

The Foodie Company

- Built a personal food application using **ReactJS, JSX**, and **JavaScript**. Designed with **Tailwind CSS**, tested with **Jest**, and version-controlled on **GitHub**. Deployed on **Netlify** to showcase end-to-end development skills.
- Technology Used: **ReactJS, JSX, JavaScript, Tailwind CSS, Jest, Github, Netlify, MongoDB**
