SUMMARY

Full-Stack Engineer with **4.5+ years** designing and scaling enterprise analytics platforms used by **1,000+ clients**. At GfK–NIQ, led backend architecture initiatives in **Java, Spring Boot, and Node.js**, cut deployment cycles from **2 weeks to 4 days**, and consolidated **5,000+ client accounts** post-merger with zero data loss. Proven track record of owning high-impact engineering from design through delivery; seeking a Senior role to drive distributed systems and full-stack product strategy.

SKILLS

Languages: Java (11/17/21), TypeScript, JavaScript (ES6+)

Backend Frameworks: Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, Node.js, Express, REST APIs, Auth0

Databases, Caching & Queues: PostgreSQL, MySQL, MongoDB, Redis (Caching), Apache Kafka

Architecture & Practices: Microservices, Distributed Systems, Low-Latency APIs, JVM Tuning, Design Patterns, GDPR/SOC2, WCAG, Agile/Scrum

Cloud & DevOps: Docker, Kubernetes, Helm Charts, Flux, AWS, GCP, Azure, Build Tools (Maven/Gradle)

Testing & CI/CD: GitLab/GitHub CI/CD, Jenkins, SonarQube, Jest, Jasmine, Karma

Frontend (Full-Stack Capability): React, Redux, Angular, HTML5, CSS3, Tailwind CSS, SSR

EXPERIENCE

GfK – An NIQ Company

June 2024 – Present

Software Engineer (SDE-2)

Pune, India

- **API Design & Ownership:** Led design and delivery of Spring Boot (REST) microservices and ReactJS frontends serving **1,000+** users; directly contributing to a **15%** revenue uplift via upsell feature delivery.
- **Zero-Trust Security & Authentication:** Architected API-key authentication using HashiCorp Vault, and Flux; integrated Auth0 with Spring Security and Node.js middleware for GDPR/SOC2 compliance; reduced login failures by **30%** and eliminated credential-exposure risk across all services.
- **Distributed Systems & Data Pipelines:** Owned optimization of Java data queries, ReactJS rendering; cut platform load times by **25%** and reduced end-to-end data latency by **29%** (227ms → 161ms).
- **Platform Consolidation & Migration:** Designed Spring Boot data-mapping services and Node.js migration scripts to consolidate **5,000+** NIQ client accounts into a unified post-merger ecosystem with **zero data loss**.
- **CI/CD:** Enhanced platform observability, elevating uptime from **98.7%** to **99.1%**; refactored GitLab CI/CD and Helm pipelines to compress deployment cycles from **2 weeks to 4 days**.
- **Tech Stack:** Java, SpringBoot, Spring Security, Redis, Kafka, Maven, ReactJS, Node.js, Flux, Auth0, GitLab, Docker, Helm Charts.

NielsenIQ (NIQ)

July 2022 – June 2024

Software Engineer (SDE-1)

Pune, India

- **Enterprise Analytics Platform:** Designed scalable, low-latency Java/Spring Boot microservices and ReactJS frontends enabling robust dataset creation for **200+** enterprise clients across the US and EU.
- **High-Throughput Data Pipelines:** Engineered Spring REST APIs and Azure connectors for real-time data ingestion; improved backend throughput by **30%** and reduced pipeline latency, supporting millions of daily data events.
- **Access Control & Admin UI:** Owned design of Spring Boot RBAC APIs and ReactJS Admin dashboard used by **1,500+** users; defined access-policy standards adopted across 3 product teams.
- **UI Modernization & Automation:** Led migration from Material-UI to NIQ design system; built Node.js scripting pipeline for automated token transformation, cutting UI overhead by **20%** and standardizing theming across **4+** applications.
- **Quality & CI/CD:** Drove ecosystem test coverage from **40% to 90%** across backend and frontend (Jasmine/Karma) services; introduced SonarQube quality gates that prevented **3+** critical defects from reaching production.
- **Tech Stack:** Java, Spring Boot, ReactJS, Node.js, Azure, Material-UI, Jasmine, Karma, SonarQube.

- **Financial Platform:** Built Angular frontend and Node.js APIs for a financial advisory platform; achieved **80% WCAG 2.1 accessibility compliance** across **1,200+** users.
- **API Integration:** Developed Node.js/Express REST APIs on AWS connecting frontend workflows with third-party financial services; improved end-to-end reliability for **1,200+** users.
- **Employee Recognition System:** Delivered full-stack Angular & Node.js application for **800+** users; boosted engagement by **20%** and raised Lighthouse performance score from **60 to 80**.
- **Component Library:** Designed reusable Angular component library backed by a Node.js service layer, reducing development time across **3+** product workflows.
- **Tech Stack:** Angular, Node.js, Express, TypeScript, JavaScript (ES6), HTML5, CSS3, Material-UI, AWS, Git, Webpack.

EDUCATION

Vellore Institute Of Technology

Master of Computer Applications; CGPA: 9.25 / 10

Vellore, India

2020 – 2022

IMED, Bharati Vidyapeeth

Bachelor of Computer Applications; CGPA: 8.85 / 10

Pune, India

2017 – 2020

PROJECTS

MovieBox | ReactJS, Tailwind CSS, Gemini AI, TMDB API, Jest, Netlify

- Architected an AI-powered movie discovery platform integrating **Gemini AI** for personalised recommendations and **TMDB API** for real-time metadata;
- Built with component-driven React architecture, **lazy loading**, and code-splitting; deployed on Netlify with CI/CD.

Reet Sangeet | ReactJS, Tailwind CSS, Node.js, MongoDB, Vercel

- Freelance end-to-end build for a music school delivered React SPA with **Node.js/Express** backend and **MongoDB** datastore; integrated WhatsApp Business API for booking enquiries, reducing manual follow-ups for the client.
- Implemented SEO best practices and **SSR-ready** routing; live in production serving real users with **zero downtime** since launch.
