SUMMARY

Full Stack Engineer with **4+ years** building enterprise analytics platforms for **1,000+ users** across the US & EU. Specialised in **React, Node.js, and TypeScript** with a track record of cutting load times by **25%**, reducing deployment cycles from **2 weeks to 4 days**, and consolidating **5,000+ client accounts** post-merger. Seeking a senior frontend or full-stack role at a product-led company.

EDUCATION

Vellore Institute Of Technology

Master's of Computer Application; CGPA: 9.25

Vellore, India

2020 – 2022

IMED, Bharati Vidyapeeth

Bachelor's of Computer Application; CGPA: 8.85

Pune, India

2017 – 2020

EXPERIENCE

GfK – An NIQ Company

June 2024 – Present

Software Engineer / SDE-2

Pune, India

- API Development:** Built RESTful APIs with **Node.js & Express** to power GfK's analytics platform, serving **1,000+** users with reliable backend data delivery.
- Product Engineering:** Delivered **ReactJS** onboarding flows and **Node.js** upsell APIs with Sales & Product teams, driving **15%** revenue growth.
- Performance:** Optimized **Node.js** queries and ReactJS rendering to cut platform load times by **25%** for **1,000+** users.
- Platform Consolidation:** Authored **Node.js** migration scripts and React UI changes to consolidate **5,000+** NIQ client accounts into a unified post-merger platform.
- Authentication:** Integrated **Auth0 & Node.js** middleware to enforce **GDPR/SOC2** compliance, reducing login issues by **30%**.
- CI/CD:** Refactored GitLab/Docker pipelines with Helm Charts, compressing deployment cycles from **2 weeks to 4 days**.
- Tech Stack:** ReactJS, Redux, Node.js, Express, TypeScript, GCP, MySQL, Jest, Docker, GitLab CI/CD, Helm Charts, SSR

NielsenIQ (NIQ)

July 2022 – June 2024

Software Development Engineer (SDE-1 / SDE-2)

Pune, India

- Analytics Platform:** Built **ReactJS** frontend and **Node.js** middleware to enable dataset creation for **200+** enterprise clients across US & EU.
- Backend Integration:** Developed **Node.js** REST APIs and Azure connectors for real-time data pipelines, reducing latency for **200+** clients.
- Admin Config App:** Built **Node.js** access-control APIs and **ReactJS** UI for a pay-as-you-use Admin app, improving data accuracy for **1,500+** users.
- Frontend Migration:** Migrated Material-UI to NIQ component library with a **Node.js** theming pipeline, reducing UI costs by **20%**.
- Test Coverage:** Expanded unit test coverage from **40% to 90%** across ReactJS and **Node.js** services using Jasmine/Karma and SonarQube.
- Tech Stack:** ReactJS, Node.js, Express, TypeScript, JavaScript, Microsoft Azure, AG-Grid, Jasmine/Karma, Jenkins

Gemini Solutions

Sept 2021 – June 2022

Technical Trainee (Frontend Developer)

Gurugram, India

- Financial Platform:** Delivered Angular frontend and **Node.js** APIs for a financial advisory platform, achieving **80% WCAG 2.1 compliance** for **1,200+** users.
- API Integration:** Built **Node.js & Express** REST APIs on AWS connecting frontend workflows with third-party financial services, improving reliability for **1,200+** users.
- Employee Recognition:** Developed a full-stack system with **Angular & Node.js** for **800+** users, boosting engagement by **20%** and raising Lighthouse scores from **60 to 80**.
- Component Library:** Built reusable production ready Angular components backed by a **Node.js** service layer, cutting development time across **3+** product workflows.
- Tech Stack:** Angular, Node.js, Express, TypeScript, JavaScript (ES6), HTML5, CSS3, Material-UI, AWS, Git, Webpack

PROJECTS

MovieBox | ReactJS, Tailwind CSS, Gemini AI, TMDB API, Jest, Netlify

- AI-based movie recommendation system using **Gemini AI** for recommendations and **TMDB API** for movie data; styled with Tailwind CSS, tested with Jest, deployed on Netlify.

The Foodie Company | ReactJS, Tailwind CSS, Jest, MongoDB, Netlify

- Personal food app built with ReactJS; styled with **Tailwind CSS**, tested with **Jest**, version-controlled on GitHub, deployed on Netlify.

SKILLS

Languages: JavaScript (ES6+), TypeScript

Testing: Jest, Jasmine, Karma, SonarQube

Backend: Node.js, Express, REST APIs, Auth0

Databases: MySQL, MongoDB, PostgreSQL, SQL

Frontend: React, Redux, Angular, HTMX, HTML5, CSS3, Tailwind CSS, Material-UI, AG-Grid, SSR, Micro-Frontend, Chart Library

Cloud & DevOps: GCP, AWS, Docker, Helm Charts, Jenkins, Git-Lab/GitHub CI/CD, Kubernetes

Tools & Practices: JIRA, Confluence, Git, Webpack, GitHub Copilot, Agile/Scrum, GDPR/SOC2, WCAG Accessibility
